IV. RESPONSE INFORMATION**A. Situation****1. Current situation :**

The weather during the reported period was windy, and temperatures ranged from 20 to 50°F. The site is divided into 45 sections, with each section composed of 10,000-ft². The site is being secured for demobilization.

2. Removal activities to date:

March 27 -April 99:

The sample results from the excavated area were below the action level for removal. ERRS arrange the disposal of the remaining rolloff box of organic sludge material from the tanks. ERRS conducted restoration of the area near the creek on the southeastern and southwestern section of the property. The Crew demobilized from site. The equipment, decon trailer, and the remaining site material was demobilized off site. The site electrical service was terminated and no further action is required on site.

3. Enforcement:

None.

B. Next Steps

No further action will be conducted.

C. Key Issues

The site is experiencing cold weather conditions. ERRS has extended the completion date to 3/30/99.
